### VULCAN NEWS ITEMS

The Imperial hotel bought the entire stock of groceries from Geo. Eamorr last week.

A Combination Auction Sale will be held on Saturday, June 19. Get your listings in early.—Shimp and Relbe

Mr. F. E. Wilson of Indiana, spent several days in Vulcan last week looking after his interests here.

Don't forget Gillespie's clearance sale of Gent's Furnishings.

Mr. T. O. Turner of Lethbridge, spent several days in town last week visiting with friends.

Allan MacFarlane Ramsay of Blackie has been appointed a notary public.

Rev. Alleyne Bradshaw of Okotoks conducted the Church of England services in the I.O.O.F. hall on Sunday last.

Don't forget to attend Spooner's big sale on Saturday as there are sure some bargains to be picked up for little money.

The additions to and remodelling of Dr. Hughes' residence are nearing completion and he expects to move in very shortly.

Mr. Walter May, who left Vulcan some time ago for Rosedale, Alberta, returned to Vulcan on Thursday last where he will again take up his residence.

See Gillespie's lines of Underwear. you can beat them for price or quality.

Mr. Ernest LeRoy, who has been employed at the People's Lunch, Calgary, for some time as a waiter, severed his connection with that institution recently and has accepted a position on the staff of the Imperial hotel.

L. T. Crawford, provincial fire inspector, paid an official visit to Vulcan on Wednesday last. He inspected nearly all the business places in town and found conditions in regard to fire prevention highly satisfactory and a credit to the town.

Don't forget to attend the band dance to be held in the I.O.O.F. hall on Friday evening, June 11. Music by the band. Dancing to commence at 9 o'clock. Admission \$1.25 a couple.

A carload of new model Ford cars was received by W. F. Jennejohn, the local agent, on Saturday last.

Mr. Guy Johnston, who underwent an operation recently for appendicitis recently in Calgary, is well on his way to recovery, according to a letter received by Mr. L. Dawson.

D. A. Bruce, post office inspector, has given permission that the post office at Vulcan may close at one o'clock on Wednesday afternoons during the months of June, July and August.

We understand that Mr. R. W. Glover of Calgary, formerly editor of this paper and who taught music here, is willing to visit Vulcan to reopen classes if a sufficient number of pupils are secured. Mr. J. A. Lindsay will be glad to furnish further information as to terms, etc.

A pleasant social time was spent on Friday evening last when a number of young people gathered at the home of Mrs. McQueen, the occasion being a birthday party given in honor of Miss Stone. The evening was spent in playing cards, games, singing and music, and everyone enjoyed themselves immensely. A dainty lunch was then served.

While talking with friends in his store on Friday evening last, about dusk, a rather unusual occurrence happened which might have had serious consequences. One of the party struck a match with the idea of having a smoke. At that moment Mr. Kehl thought of a tire which he had been fixing during the day, which was standing close by, and requested that the light be held so that he might inspect it. No sooner was the naked light held near the tire when the gasses coming from the glue ignited and caused some excitement. The flame was easily subdued, however, but the incident goes to show that great care should be taken with naked lights where inflammable material is exposed.

### BAND CONCERT

The band concert put on by the Vulcan band on Sunday evening last in the Community Theatre was very well attended and soon after the doors were open seats were at a premium. Now that the spring work is over the people in the outlying districts can get into town and they were sure there in force on this, the first opportunity some of them have had of

### AGRICULTURAL SOCIETY

A meeting of the directors of the Vulcan Agricultural Society was held in the I.O.O.F. hall on Saturday afternoon last and after the minutes of the previous meeting were read and adopted the business of the meeting was proceeded with.

The president, Mr. Galbraith, informed those present that for certain reasons it was thought advisable to postpone the fair to be held on July 31, and for that reason the meeting had been called with a view to hearing the opinions of the directors concerning this matter which was of vital importance to the town and district.

Owing to the flu epidemic at the time of the meeting of the Fair Association held in Edmonton last February, he, as delegate for Vulcan did not attend. However, the secretary had written asking that August 19 be allotted to Vulcan as the day on which to hold their fair. For some reason, however, this was not allowed and July 31 fixed.

This date, owing to the lateness of the season, is thought to be very unsatisfactory from every standpoint and more especially from the fact that it does not allow time for the exhibition of this year's grain and vegetables. Several other reasons against it were also pointed out and discussion being then invited, it proved to be the unanimous opinion of those present that the fair should be postponed to a later date if it was to be a success.

The question as to the best time to hold the fair was then taken up. Several plans were proposed, among which was that the fair be held on the same date, if possible, as the school fair, which would be some time in September. After some discussion this plan was deemed best and it was proposed by Mr. Bowie, seconded by Mrs. Martin, that the secretary be instructed to try and arrange for the holding of the fair at the same time as the school fair to be held in September and that he also try and secure the I.O.O.F. Hall for the exhibits of grain, vegetables, fancy work, etc. The meeting was then adjourned till a later date.

### AN UNUSUAL SIGHT

While making a tour of inspection of the buildings of the town, re fire protection, on Wednesday last, L. T. Crawford, provincial fire inspector, got a very agreeable surprise when he inspected the Advocate office. As a rule most printing offices are generally littered with paper, etc., dirty towels lying around and a host of other litter which helps to give such places of business a very untidy appearance. This fact being known to the above named gentleman he made a special request to Reeve Butchart, who accompanied him, to show him the print shop that he may look it over. His royal highness was accordingly brought in and presented to the staff, including the devil, who luckily looked nice and tidy for a wonder. They looked him over, of course, and at the same time noticed the look of surprise on his handsome face as his eyes wandered over the room and its contents. Finally he condescended to speak and with a beaming smile congratulated us upon the cleanliness and orderliness of the office and said that it was, without doubt, the cleanest printing office in the province. We knew all this, of course, before he gave us the information, but we thanked him, and now pay him a compliment in that he is the only government official we know who was so congenial in the performance of his duty.

### DISPOSAL OF HOUSE SLOPS

The reeve of the town takes the opportunity to offer the citizens of Vulcan a satisfactory and sanitary method for the disposal of house slops. The fly season being at hand, careful consideration and adoption of this system would be a good step toward sanitation.

Take a wooden barrel with the ends out, dig a hole in the ground deep enough to sink barrel three-quarters of its depth, then fill barrel within five inches of top with rock, covered with a three inch top dressing of coarse gravel. This will take care of all house slops in a most satisfactory manner, the bacterial action handling the slops in the only way possible under existing conditions. A cover made from the top would provide the most sanitary method of this disposal.

### SCHOOL REPORT

Following is the standing in the different grades for the month of May:

Grade VIII—Laura Terry 79, Elizabeth Flood 75, Esther Ferngren 72, Eunice Walker 62.

Mildred MacPherson absent from examinations.

Grade VII—Grace MacDonald, Ruth Rolston 72, Joe Korczynski 64, Cora Gardner 61, Jack Trail 58, Dorothy Altizer 54, Agnes Rannels 53, Rilla Watt 51.7, Addie Flood 51.4, Genevieve McIntyre 48, Marry Terry 48, Queenie Daines 42.

Grade VI—Beulah Walker 82.5, Jennie Cook 80.7, Edith Rolston 76.7, Willie Butchart 73.8, Florence Loiselle 69.4, Minnie Korczynski 69, Beulah Hampton 63.1, Ena Watt 59.6, Ida Eamorr 53.5, William Kaiser 48.7.

Grade V—Marion Lebeau 88.7, Norman Jennejohn 83.8, Stella Dewie 80.6, Ruth Ferngren 80.2, Phyllis Trail 80, Albert Flood 79, Jewell Gardner 74.1, George MacPherson 72.5, Harry Rolston 72.3, George Seaman 70.6, Grace MacKie 69.8, Willie Thomas 69.8, Florence Recor 68.2, Charles Kothlow 66.5, Mary Fulton 64.2, Wilfred Daines 64.1, Roy Thomas 63.2, Gordon McIntyre 60.9, Jack Kelly 60.1, Olive Dunbar —, Verna Kothlow —.

Grade IV—Russell Robbie 84.7, Charles Kaiser 84.3, Muriel Brown 82.1, Veronica Reed 81.4, Olive Linley 81.3, Hazel Eamorr 80.2, Eleanor Jennejohn 76.8, Clifford Ogilvie 76.2, Glen Robbie 75.6, Maud Wilson 73.6, Wallace McIntyre 73.5, Fred Vanskiver 58.4.

Grade III—Vietta Grant 86, Buford Walker 85.8, Emil Mutz 85, Harold Thomander 81.5, Chester Thomas 80.1, Ernest Granleim 76.9, Cecil Duffield 76.6, Dorothy Martin 76.1, Russell Collier 75.5, James Walker 75.3, Robert Spooner 72.2, Edward Wilson 72, George Rannels 71.8, Alice Eamorr 71.3, Lowell Granleim 67.8, Norma Vanskiver 66.2, Georgie McKie 66.1, Annette Loiselle 65.4, Dorothy Kothlow 54.4.

Grade II—Rosie Korczynski 89, Gerald Trail 85, Herbert Linley 84.8, Leslie Hanson 84.6, Margot Trail 82.4, Isabel Flood 81.2, Helen Craig 79.4, Arthur Cook 79.2, Barbara Howes 77.4, Mildred Gardner 77, Leo Loiselle 75.6, Charlotte Recor 75.2, Arthur Duffield 71.2, Fred Noyes 62.4, Chester Dewie 61.4.

Grade I (a)—Will Cunningham 90.6, Ailsia Charters 89.3, Leta Roe 89, Jean Rolston 85, Irva Wooters 84, Sylva Seaman 83, Clarence Martin 83, Eugene Hanson 82, Elwood Lebeau 81.6, Eunice McIntyre 80, Katie Dewie 78.

Grade I (b)—Doris Duffield, Clinton Markham, Harold King, Alice Berringer, Irene Loiselle, Elmo Pitts, Elmer Shaw.

Grade I (c)—Bertha Adams, Edward Jamison, Billy Charters, Bruce Vanskiver, Marion Flood.

Not ranked: Mary Johnston.

Grade I (d)—Dora McPherson, Loren Torgerson, Jack Anderson, Donald Carson, Royce Clark, John Dewie, Russell McCutcheon, Frank Kothlow, Arlo Journey, Minnie Eamorr, Martha Adams.

Not ranked: Mable McPherson.

### COUNCIL MEETING

The regular meeting of the village council was held on Thursday evening last, those present being Councillors

Stack and Dewie, Reeve W. E. Butchart and Secretary-Treasurer A. J. Flood. Minutes of the previous meeting were read and adopted and the following business transacted.

Several matters relative to the erection of a bandstand for the Vulcan band were discussed and it was decided to go ahead with same and the secretary was instructed to see that work be started immediately.

The unsanitary condition of the City Lat dry was again on the table and in view of the fact that the provincial health inspector ordered this place to be put in a sanitary condition as soon as possible, and nothing yet been done in the matter, it was decided the council would take action against them if same was not done immediately.

It was also decided that the village hold a celebration on Dominion Day, July 1, which will be observed as a public holiday and a program of sports drawn up by a committee to be appointed. The meeting then adjourned.

### SMART CAPTURE

While returning to Vulcan by train after a tour in the Blackie district on Tuesday, June 1, Corporal Allen, our local member of the A.P.P., recognized one of the passengers as a much-wanted man by his department and immediately put him under arrest and lodged him in the local pen for the night. The prisoner is A. Paulson, of Lethbridge, who some time ago distinguished himself by his behavior and is wanted by the police authorities of that city on a charge of false pretences and issuing a cheque for \$200. He disappeared soon after committing the crime and it is thought he has spent a considerable time in the States. However, thinking it safe to do so, he returned to this country and was on his way to Vulcan when picked up by the Cpl. Allen. He intended taking the stage from here to Lomond and from there make his way to Travers, where he had formerly resided. Corporal Allen took his prisoner to Lethbridge on Wednesday morning where he will be tried for the above offence.

### SUBSCRIPTION RATE INCREASE

Newsprint reached the high water mark on June 1, when the wholesale paper houses announced the price had risen to 11 cents a pound. We have endeavored to conduct the publication of The Advocate at the old rate but we discover that self preservation compels us to increase the subscription price of The Advocate to \$2.00 in Canada and \$2.50 in the United States and Great Britain. In the meantime we ask all who are in arrears to pay up before the first day of July, for upon that date the increased subscription will go into effect. On the label of the paper going to each subscriber is the date until when the subscription is paid up. Just look it up. Don't wait for a statement of your subscription account.

Mrs. R. E. Dodds received a cable on Saturday informing her of the death of her father on Friday last at his home in Leicester, England. The deceased gentleman was 58 years of age, and besides his family, leaves a host of friends to mourn his loss. The sympathy of the community is extended to Mrs. Dodds in her bereavement.

### DEVELOPING OIL RESOURCES

Development of the oil resources in Alberta is proceeding along progressive lines. The Dingman field which has been proven, is now producing oil through the Dingwell wells at a profitable rate, the Dingman Company having produced profitably a large amount of high class petroleum last year. For the first time in its history the Imperial Oil is undertaking development on an extensive scale and has chosen Alberta for the seat of these activities and is spending thousands of dollars in an effort to ultimately prove the Alberta oil resources and now has rigs working at several locations in the province. One of these is in the boundary country near Cardston, Alberta, where oil prospecting has been going on more or less for the past 30 years. Another site of the Imperial Oil Company's activities is west of Nanton, Alberta, southwest of Calgary in the foothills. This is one of the most promising of the company's locations. Another site is at Czar, Alberta, northeast of Calgary where very promising showings of oil have been obtained. In the far north the company has also undertaken oil prospecting. On the upper reaches of the MacKenzie river, where there are believed to be rich oil resources, the company is preparing to carry extensive development. Rigs will be placed there this summer and in spite of the difficulty of reaching such a far northern point with supplies, etc., the company is determined to leave nothing undone to prove this field. The company is preparing to spend at least \$50,000 one each well, to carry out its development scheme.

### HIGH COST OF LIVING

In an interesting circular issued by the Royal Bank of Canada, the declaration of the Supreme Council of the Peace Conference is published, which gives one an idea as to the causes which combined to produce the present high cost of living. The circular goes on to say that—

Canada's contributions were among those resources of the world which were destroyed during the war; and by that much the country is a loser from a material point of view.

The expansion of domestic credit, the increase in paper money, and the higher prices that these entail, are present facts in Canada, though in a lesser degree than in Europe.

The recommendations of the Supreme Council therefore deserve close attention. Those particularly applicable to our situation are, in substance;

1. That governments and individuals should practice the strictest economy, and should realize that extravagance of any sort reacts on every household by raising the cost of all articles.

2. That every possible means be taken to increase production; and that to this end all classes co-operate to avoid strikes and lockouts with their resultant waste of working days.

Prior to the war, the capital required to finance the many fresh requirements of this growing country was drawn to a great extent from England. At the present time Canada is forced to stand on her resources, and must either herself provide, from the savings of her people, the capital needed for construction and development, or see the progress of the country retarded.

### RELIGION AT LOW EBB

Dr. Bland, in addressing the Methodist conference at Edmonton, declared that religion in Alberta was at a low ebb and its testimony deplorably weak. It was also revealed that questionnaires sent out by the Bible Society and the U. F. W. A. show that from 30 to 40 per cent of the population is without any of the ministries of the organized Christian church and that a third of the children of the province are growing up without any systematic instruction in the Bible.

It is admitted further, that over wide areas where religious services are held the weakness and indifference and disregard of the obligations of public worship. The testimony of religion is weak, ambiguous and unworthy.

### CROP AND LIVE STOCK REPORT

The crop situation over the past fortnightly period is marked by two outstanding features — favorable outstanding features, favorable moisture conditions throughout the province and rapid progress towards the completion of seeding. Light showers have kept the under supply of moisture moving up to the roots of the crop but not heavy enough to check seeding. Horse and machine power are proving about adequate to needs. Good labor is rather scarce. The reduction in total crop area is almost negligible subject to possible reduction in ripe grain and larger supply of green feed on account of lateness of season. Wheat acreage is reduced ten per cent for the province, oat and barley acreage increased in Southern Alberta but not much increase in centre and north.

Regular wheat seeding completed a week ago except for small belated areas. Oats and barley 60 per cent completed in Southern Alberta but only 30 per cent in Peace River country. Progress of crop not yet rapid on account of cool weather but wheat is nearly all through and well rooted; rye is excellent. The general lateness of the season and high winds over a small area are the only limiting conditions to good results. Some soil blowing has occurred at certain points in the south but prospects have improved since last report and on the whole excellent.

Grass on the prairie is the best in years. Stock losses are over. Loose horse stock already considerably improved and cattle stock beginning to fill. Sheep are doing well but the lamb crop is not heavy. Pig stock is in the worst situation of any. Over 60 per cent of sows that should litter this spring were sent to the packing plants last fall. The pork output this year promises to be light.

### THE BILINGUAL CANADIAN

"A knowledge of French, by which is not meant a bowing acquaintance, is a very valuable asset throughout the world. In Canada it is naturally of peculiar value. Ninety per cent of the suspicion and misunderstanding between the two groups that make up this country's population and that retard the progress and well-being of Canada, is due to the inability of these groups to understand each other's mother tongue.

"Whether or not compulsory French or English in our schools and universities is a wise policy, there is certainly no doubt about the wisdom of the French or English student who determines to learn the other language. He is the master of an asset which will serve, and sooner or later, pay him well. More than that, he is a better Canadian."—Montreal Star.

### OPTIONAL WITH SCHOOL BOARD

Evidently a new departure has been adopted by the department of education. Formerly, in connection with departmental examinations, it was customary for the department to make appointment of supervisors, which usually meant an interchange of principals. Now the school boards are asked to make the appointments and it is optional with them as to whether or not they allow the principal of the school to supervise the examination of his district's pupils.

### MILLIONS FOR DEVELOPMENT

Eighty million dollars of British capital probably will be brought to Canada as a result of the visit of inspection Count De Topper of London, England; and Nice, France, is making to Winnipeg and the west, says the Manitoba Free Press.

"There is no doubt that the resources are here, and if, after this trip through the west I am satisfied that circumstances warrant, I shall go back to England and satisfy my friends that they will be justified in investing between 15 or 16 million pounds in this country," he declared.

### SHOULD GROW MORE TREES

Word comes from the east that the Canadian Forestry Association is sending a demonstration car through the west for purpose of interesting farmers in growing more trees on the prairies to serve as windbreaks and help to moderate the climate.

The plan is a good one. Trees can be grown on the prairies. Plenty of farmers in even the bald-headed prairies have made a success of growing windbreaks. But too many of them pooh-pooh the idea as impracticable.

If Western Canada farms are ever to become homes of a settled and contented population tree-growing will have to become more general than it is today, and anything the Canadian Forestry Association can do to hasten the day will be of benefit.

### 50c FOR TWO MANGE DIPPINGS

Fifty cents per head for two mange dips, calves not counted, was decided by Judge Hyndman in a case tried at Calgary, to be a price which would recompense for the dipping of the cattle in the Morley district last fall, instead of the charge of 80 cents, and 20 cents for calves, which had been the price which they were originally asked to pay. The case developed out of the order to dip the cattle in the Morley district last fall, when it was found that the only vat was on the Indian Reserve, near Morley. ### FOSTER'S WEATHER FORECAST

(From the Calgary Herald)

Warm waves will reach Vancouver B.C., about June 2, 10, 16, 21, and temperatures will rise on all the Pacific slope. They will cross crest of Rockies by close of June 3, 11, 17, 22; plains sections 4, 12, 18, 23; meridian 90, upper great lakes, Ohio-Tennessee and lower Mississippi valleys and eastern sections 6, 14, 20, 25, reaching vicinity of Newfoundland about June 7, 13, 21, 26. Storm waves will follow about one day behind warm waves, cool waves about one day behind storm waves.

Temperature trends of June are expected to begin a reversal that will continue all summer and general average temperatures are expected to be as much above normal as they have for several months past been below normal. This change will be gradual and June will probably not average much above normal temperatures.

Rains of the week centering on June 5 are expected to be heavy in many sections, following which much less rainfall is expected and much better crop weather where there has been too much rain. There are no indications of the excessive evaporation that makes the drouths so destructive of crops, but as an average of the whole I expect much less rain on this continent than has fallen during the past several months.

This lessening of rain where moisture has been too great and an expected increase of moisture where deficiencies have prevailed, are counted on to improve crops generally following June 6.

I advise to replant or plant and sow new crops where dry weather or excessive rains have seriously damaged the crops. I would prefer planting cotton rather than corn in the southern states, because corn requires more moisture than cotton requires. I am not expecting early frosts in northern sections and believe it will be fairly safe to plant and sow late maturing crops.

I am not expecting much hail. I can not locate hail storms and there is no way to dodge them. I am fairly successful in giving the dates of hail storms and do not expect hail in June after the 6th. I still expect northern frosts during the week centering on June 5. Temperatures on meridian 90 are expected to be low near June 9 and then gradually go up more rapidly than the season would suggest and remain up till close of the month.

The sun was eclipsed on May 18, but not visible in this country. A remarkably large number of people do not understand the cause of such eclipses and a few even still have superstitious ideas about these natural events. The moon passing between the earth and

sun hides a part or all of the sun. When the moon is at perigee—the point in its orbit where it comes nearest the earth—and at the same time passes centrally between the earth and sun, a total eclipse of the sun occurs, the moon cutting off all the light of the sun. When the moon is at apogee—the point in its orbit where the moon is farthest from the earth—and at the same time the moon passes centrally between the earth and the sun, the moon being far from the earth, does not cover all of the sun, but at the greatest part of the eclipse a ring of sunlight is seen around the moon; that is called an annular eclipse, the word annular meaning a ring. When the moon covers only one side of the sun it is called a partial eclipse, same as occurred on May 18, when the moon covered the southeast part of the sun, the eclipse being seen only by the inhabitants of western Australia and by sailors who were on the Indian ocean between Australia and Madagascar.

Whatever the food conditions in other parts of Europe, England will always have her Irish stew.

An epidemic of leaks in the Edmonton waterworks system kept gangs going at full speed during the holiday period.

### PROVINCIAL NEWS ITEMS

The Lethbridge Business College, Co., Ltd., has been incorporated, with a capital of \$10,000, and will own and control the Lethbridge branch of the Grubbs Business College.

The town of Okotoks offered \$4,000 worth of debentures for sale and one firm of bond sellers offered to invest at the rate of 88%. The council refused and later sold to a town resident at par thus saving the town \$440 besides giving the local investor a very good deal.

The Nanton tennis club was reorganized last week. The membership fee is \$4 for gents and \$3 for ladies.

Fur prices were lower from 30 to 50 per cent last week as compared with the price of a fortnight ago.

Are you fully prepared to enter into the dipping campaign with a determination to win out?

The Imperial Oil Company purpose erecting two oil tanks near Parkland.

Kansas farmers want \$3.13 per bushel for their wheat this year.

The prediction is made that the next boom in Alberta will be in oil.

From the government elevator at Calgary 800,000 bushels of wheat and 325,000 bushels of seed oats were supplied this year to farmers of the province.

Walter Dunham, of Lethbridge has the honor of having the first Rhodes scholarship in the history of Lethbridge.

The sessional indemnity of the members of the P. E. I. legislature amounted to the fabulous sum of \$200 per year. They now demand \$500 indemnity which is probably all they are worth.

The Al. G. Barnes' circus will tour Alberta this summer.

Now that hay is not required there appears to be a great abundance of it in the country and there are many who, holding for a high price, are now confronted with the bald fact that they must make a sacrifice or hold for prices to advance which will be in the dim distant future.

W. F. Stevens, of the Cattlemen's Protective Association, has been investigating some of the stories related in the early spring about the heavy losses and stockmen being compelled to shoot their stock owing to shortage of feed. Rumor had it that a certain farmer near Acme had shot 50 head of cattle, and it now turns out that one of his horses met with a serious accident and he decided to end the sufferings of the animal and save his feed for the rest of his stock. Thus, in this instance, one crippled horse was converted into 50 head of cattle, which is "going some."

Only three out of every 100 men leave an estate of \$10,000 or over; 17 leave estates of from \$2,000 to \$20,000; 80 leave no estate.

The deepest well in the world was recently drilled near Fairmont, West Virginia, the depth being 7,517 feet, search being made for oil.

There were more Smiths in the last American army than men of any other name. These totalled over 51,000. Second in the list stood the Johnsons, numbering 29,000. There were about 22,500 each of Greens and Joneses, 9,000 Browns. There were 74 George Washingtons, 79 Robert E. Lees and 2 Abraham Lincolns.

It is declared that many Vancouver lumber mills will close owing to excessive demands made by loggers.

Next year's naval budget was fixed at about \$436,000,000, under a complete agreement on the naval appropriation bill reached today by senate and house conferees. The original house bill carried \$425,000,000 and the senate about \$467,000,000.

The United States people are eating candy at the rate of a billion dollars a year, yet they complain of a sugar shortage. Secretary of the Treasury Houston declared in an address recently before the Bond Club of New York. He said the volume of the national confectionery feast was estimated on the basis of tax receipts for this year.

**MAKES TAX A BUGBEAR**

Is not the matter of our municipal tax made a bug-bear? Is it not given too great a place in the public mind? Study of the subject would indicate that but affirmative replies can be made to these queries. The tax is higher than it has been. So is everything else. The food consumed, the clothing worn, and the salaries paid, have all advanced. The cost of education and administration of our municipal affairs has also increased. To meet these demands the public as a private purse must be increased. The people must pay. In doing so they are but carrying on their own business. For the taxes paid they receive a large return, possibly, were it figured out, greater than from any other investment. There is fire and police protection, sidewalks, good roads, improved social conditions because of the enforcement of the laws of the municipality and the province and many other benefits that accrue from the annual investment of thirty, forty, or even fifty mills on the dollar. But why make this payment the bane of life? Why keep it in the forefront? After all is it not but one in-

cident in the round of the year's business, one that in comparison with many others will stand far down the line of importance.

**NO CLASS DISTINCTION HERE**

While Earl Minto and George Lane were motoring to High River from the Bar-U recently they were mired in the road opposite Count de Foras' farm and could not get out. A farmer from Meadow Bank happened along with a four-horse team and upon being asked to extricate the car, refused point-blank, as he had troubles enough of his own to contend with. "I am drawing oats, not cars, go to hell," was the reply given. Mr. Lane, however, used his persuasive powers and finally got the required help. When the Earl and party were ready to go Mr. Lane pulled out a wad of bills from which he extracted a ten-dollar bill and offered it to the man from B. C., who emphatically refused with the remark, "You may keep your money but I will dine with you when I get to town. Later on the Earl, Mr. Lane and the Meadow Bank farmer were seen in the St. George lunch

rooms enjoying a hearty meal together.

**MAINTAINING ACREAGE**

Fears which were entertained as to the reduced acreage in Alberta this year owing to the late start, may after all have been somewhat exaggerated. From a great many districts the latest reports are that such rapid progress has been made that there will be about as much land under cultivation this spring as there was in 1919. Germination is very rapid and everything is looking mighty fine.

**DON'T TAKE CHANCES WITH MANGE**

(By W. F. Stevens)

A combined and general effort is being made by the majority of the cattlemen of the province with a view to removing what is called the mange area. There is a commendable spirit of co-operation manifested by these men. They have been taking stock of what they have been losing during the past on account of mange, and have decided that it is folly to have these losses continued any longer than is absolutely necessary. "Clean up" is the slogan and a clean up they intend to make of it.

Naturally there are a number in the suburbs of our towns and cities, and small farmers in the vicinity who own only two or three cows, who fail to see any reason why they should dip their animals. They argue, "our cows never mix with other cattle and have never had mange; then what is the sense of making us dip them?"

There is doubt but the argument holds good in most cases, but past experience shows that outbreaks have occurred every year in herds kept under exactly the same conditions described by these people, and no one knows in whose herd it will appear this year. In view of the importance of the matter, the small expense and almost total absence of risk connected with this work, why take the chance of re-infecting the herds of the district.

Sometimes a farmer calls and says: "I have a steer that has a sore foot or some other ailment. There is no sign of mange on him and he is un-

able to walk to the vat which is several miles distant. Then, why not exempt cases of this kind?" There is no doubt that in a majority of cases that would be a safe thing to do, but there are sure to be some cases from which re-infection of herds would result, and considering the small profit there is in keeping a crippled animal of any kind, or the small expense of hauling him in a wagon if only slightly or temporarily disabled and the heavy losses that a "close quarantine" entails, "Why take the chance?"

It is to be hoped that no petty considerations will be permitted to defeat the stockmen in their ambition to make Alberta a clean province. On the pretext of danger of disease, Canadian cattle are excluded from Great Britain, and on the same pretext agitation is now going on in the United States to exclude them from that country also.

Why jeopardize our markets and thereby our business because of minor matters?

**CONDITION OF CROPS**

In Saturday's issue of the Calgary Herald the following crop reports were published, the reports being sent from the different points by crop correspondents:

**HIGH RIVER, June 4.**—Seeding, except for green feed, has been completed. Wheat acreage is less than last year and oats slightly greater. Total acreage in grain about 25 per cent decrease. Some barley and rye have been sown and a small amount of flax. The acreage in potatoes will be more than usual. Splendid rains, and other conditions have been just right and prospects are great. Hay and pasture lands fine, livestock doing well. General outlook is the best.

**MANTON, June 4.**—Seeding in this district is almost completed, only some wet places left. All wheat is up and looking fine. More oats will be grown this year owing to the lateness of the season and inability of procuring barley for seed. Stock is starting to pick up with the heavier growth of grass.

**CAYLEY, June 4.**—Seeding is practically finished except oats for green feed. Crops look well. Plenty of moisture and acreage compares well with last year. Gardens not looking good on account of insufficient warm

**VULCAN TIRE STATION**  
Next to Post Office

weather. Pasture is growing fast. Cattle, horses and livestock on the ranch are doing well. With light showers and warm weather, prospect for the crop is first-class.

**VULCAN, June 4.**—Wheat all sown, oats, 96 per cent; barley, 30 per cent; rye 40 per cent; flax, 20 per cent. Growth is steady. Plenty of moisture with rain Tuesday followed by warm weather. About 50,000 acres are seeded in Vulcan district, 65 per cent of this is seeded to wheat. Grass is growing fast and cattle and horses are in good condition. The general situation is encouraging and farmers growing more optimistic every day. The outlook is for a good crop. Not more than one per cent damage by winds.

**OKOTOKS, June 4.**—All seeding is done here. Oats and rye the principal grain sown this year. Less wheat and no flax grown this season. Considerable potatoes have been seeded. Growth and moisture conditions are very good and farmers optimistic. There should be plenty of hay and

grass, and livestock will do well from now on. Recent rains have done considerable good. Horses getting in good shape.

**NAMES COUNT, NOT PRINCIPLES**

If any one of our readers is intending to emigrate to Montana to run for office, we advise him to change his name, unless it already begins with an early letter of the alphabet. At the recent Presidential primary in that state certain managers—what an apt designation of them!—chose as their candidates eight men, not one of whose names begins with a letter further along in the alphabet than D. The names appear on the ballot in alphabetical order, and experience shows that few voters take the trouble to find out who are the best men on the ticket, but mark those whose names stand first. — Youth's Companion.

### FREEDOM OF TRADE

"The theory of protection is that we should export but not import. Well, I want to tell you, hon. gentlemen, that never has been done in the world, it cannot be done, and it never will be done. If you want to promote exports from your country, which of course, means the promotion of the production of wealth in your country, you must be ready to import."

"There is only one way to make our railroads successful: it is not by raising freight rates, it is by increasing freight; it is not by increasing charges upon a limited number of people, it is not by limiting your trade, it is by increasing it; and you can only do that by taking the (tariff) obstacles out of the way. I venture to think that the application of free trade principles would build up our

population to 15,000,000 in ten years and increase our commerce in a way that would stagger humanity." —Dr. M. Clark, M.P.

### WE WANT THE NEWS

Do you live in the country? If so, and you have the personal items, call us up. We want all the news items, big or little from town and country. It doesn't make any difference whether we have a correspondent in your locality or not. They may miss an item, so call us up. We don't mind being bothered. Live country news is what we're after and it is acceptable from any quarter and from any person whether a subscriber to this paper or not.

### "I AM AN AMERICAN"

The following from "Chalmers Comes Back" by W. J. Dawson, is the latest contribution to a question which has been widely discussed and has been the cause of not a little ill-feeling:

"I am an American, so don't think I capable of disparaging America. No armies have fought with finer devotion than our American boys. They are equal of the best. But they didn't win the war. They came too late for that. They helped turn the scale beyond doubt. That was a great thing to do. But if you will look at the casualty list of the last three months of fighting, you can easily discover who bore the brunt of the struggle. For week after week the British casualties ran at thirty to forty thousand. I'm not saying that the American troops wouldn't have fought as well, but they weren't there in sufficient numbers. They held one end of a long line, and held it splendidly. They did great things in the Argonne. But do you know that up to the very end of the war hardly an American aeroplane was in the air? They weren't ready. The American aviators flew in French and British machines. Sometimes they had refitted them with American engines, but that was all."

The fact is—and it's a splendid fact—that America had laid her plans for a long war. She had built railways right across France to supply her troops with food and munitions. She had organized with tremendous efficiency for at least four years of war. Obviously it follows that when the war ended suddenly, she had not put forth her strength. It was there but it wasn't mobilized. Therefore it's nonsense to say that American won the war. She helped immensely by her wealth and her unsuspected military efficiency and the effort these things had in destroying the morale of Germany. She helped to the utmost of her opportunity in actual fighting. Isn't it enough to say that, without parading all the streets with placards "The Yanks Did it?"

"I should be a very poor American if I didn't do justice to my comrades in arms. I don't suppose you know it, for the world generally doesn't know it yet, but the Canadians were the hammer-head of all the great final attacks. They were always put into the place of the greatest danger. They used to be called "Foch's pets." But I've never heard them boast that Canada won the war. For four years and a half they fought from Ypres to Deccourt, but I never heard them boast about it. It's this spirit of boasting I dislike. It's petty. It's parochial. It isn't worthy of America. It's just because I am an American that I hate to hear any American talk boastfully of his own doings in tacit disparagement of those who fought much longer than he, and against more terrible odds."

### HE WAS IN A HURRY

The Strathmore Standard reports a terrible auto accident at a crossing two miles west of Strathmore when two farmers riding in the back seat of a car were killed, while the driver, Mr. A. Neilson, a farmer near Standard, escaped practically without injury. He was placed under arrest but was later released after he told his story which was to the effect that they had been travelling from Calgary with the curtains up, and that no train was in sight at the bend of the road a few hundred yards from the crossing, and that they heard no sound to warn them of the oncoming express. The car had practically cleared the track when the locomotive struck the rear right wheel, throwing it into the ditch and pinning Neilson beneath it.

### DON'T JERK THE REINS

The first and worst of all the cruelties inflicted on horses is the perpetual jerking of the reins, which is in evidence all over the cities and from every degree of driver—jerk, jerk, yank and twitch all day long, leaving horribly mangled tongues and lip angles, bruised bars and broken jaws, and entailing frightful suffering from the abuse of the most delicate and sensitive members, remarks the New York Herald. The lower jaw is a bundle of nerves and paper skin, utterly defenceless against the brute on the seat, who knows that when the whip falls dead on the reeking body, the scientific jerking of the bit will bring effort after effort from the spent and suffering horse.

### ARABLE LAND IN CANADA

Canada has at least one-half as much arable land as the United States. Canada has 400,000,000 and but 40,000,000 under cultivation, or but one-tenth, though all of the United States 800,000,000 acres are under cultivation now, though superficially.

"Yes, I'll make it. The truck runs smoothly and dependably because I use nothing but Imperial Polarine for lubrication and Imperial Premier Gasoline for fuel. That's the unbeatable combination which keeps the mail on time."

## Accurate Thorough Lubrication

IMPERIAL Polarine gives thorough lubrication under every operating condition. Cars and trucks give longer, cheaper service when lubricated with Imperial Polarine.

Imperial Polarine will not break up or run thin under continued operation. It reduces friction to a minimum by maintaining a coating of oil on every wearing surface. It seals all the power behind the piston by establishing a perfect piston-to-cylinder seal.

Learn which of the three grades described below is best suited for your car from the Imperial Polarine Chart of Recommendations, which is on display wherever Imperial Polarine is sold.

Sold in one-gallon and four-gallon sealed cans, half-barrels and barrels, also in 12½-gallon steel kegs, by dealers everywhere.

#### WE OWE THEM MUCH

Certainly the general public and very often agriculturists themselves, fail utterly to realize what a large and important part is played in the development of the agricultural industry, by well managed exhibitions.

Directly, or indirectly, every phase of agricultural work receives benefit from our fairs and there is no question that had it not been for the fairs of the past, agriculture would not have reached its present status.

The breeder, the gardener or the cerealist may work along conscientiously for years and yet be in a rut—until they have an opportunity of meeting others of their following, in competition, they have little means of knowing what progress they are making or of knowing how their product measures up with the standard of the day.

The fairs therefore, serve as educators and correctors and really set the standards to which the workers in all the various lines can aim, but above all else they are the institutions which help to keep alive that friendly rivalry among the workers without which there is no progress.

While Western Canada throughout is very fortunate in having live progressive exhibitions we feel that the character and general management of our leading Alberta fairs, those of Calgary and Edmonton are worthy of especial mention. In the face of conditions which were anything but helpful both these associations put on spring events recently which were extremely creditable, in every sense, and which were carried through in a highly efficient manner. Alberta has reason to be proud of her fairs.—Farm and Ranch Review.

#### TO ROUGH IT IN THE WEST

Roughing it in the great Canadian northwest in combination with being a neighbor to the Prince of Wales is proving an irresistible attraction for movie stars, noted polo players and blue eastern millionaires seeking new thrills, judging by letters that are pouring into Guy Weadick, proprietor of the new T. S. ranch, 37 miles southwest of High River.

Mr. Weadick, who came into prominence as a champion roper and rider as well as manager of the Calgary Stampede, has established his ranch with the idea of providing tourists with a sample of real outdoor life in the west. The chief attraction arranged consists of various pack train tours through the mountains just beyond the foothills in which the ranch is situated. Eight miles away from the T. S. ranch headquarters is the new ranch of the Prince of Wales, which His Royal Highness is now having stocked with blooded horses and cattle.

#### Three Principle Trips

According to Mr. Weadick, who was in Calgary last Wednesday completing arrangements for receiving tourists at his ranch, there will be three principal outing trips for tourists from the headquarters, consisting of ten, twenty and thirty days each. The route leaving the ranch will be up the Highwood river to Cataract creek, thence across Oyster creek, the Old Man river, Dutch creek, and Wild Horse creek, coming out in the vicinity of Blairmore and the Crow's Nest Pass. About ten days will be required for this trip through some of the wildest regions of the Canadian Rockies. The twenty-day trip is a continuation of this route on from Blairmore to the Waterton Lakes, coming out at Pincher Creek, while the thirty-day trip carries the tourists on across the international boundary into Glacier park, coming out at Belton, Montana. A shorter trip also will be provided to Kananaskis and back, requiring about a week.

#### Camp on Trails

There will be no way stations on the trips through the mountains and those who make them will carry everything for camping by means of pack horses. Aside from the wonderful scenery for which this district is noted, the fishing is superb, and this sport will be the chief attraction to the outdoor life of the campers.

For those who cannot take the time for these longer trips, Mr. Weadick is planning various attractions at the T. S. ranch headquarters for weekend visitors, including short fishing trips, saddle horses, and later on, a golf course will be laid out. In the summer months, the camp can be reached from Calgary over good trails by automobile in three hours, and the Alberta government has agreed to repair and maintain suitable bridges over Flat and Sullivan creeks on the route to the camp.

The name T. S. ranch is taken from the brand of the stock for the ranch, a letter "S" joined to the bottom of the letter "T," and these initials represent the words "The Stampede."

#### Movie Players Coming

News of this new outlet in the west for those who are pining to get "back to nature" as well as to experience the life of the range rider and mountaineer, has penetrated to many eastern cities as well as to the home of the moving picture. From the latter, Mr. Weadick has a number of communications from managers of famous motion picture concerns who have become especially interested lately in the Canadian northwest. They wish to bring companies up on "location" for western scenes, and a letter from Thomas Ince states that he plans two or three pictures this summer set in the Canadian northwest and desires to locate the companies at the new "wild west" ranch.

"This project," said Mr. Weadick, "while new in Canada, has been tried out by a number of others in the western United States, but while successful at first, most of them made the mistake of making things too easy and refined for the visitors. They gradually drifted into 'log cabins,' with hardwood floors, electric lights, tiled baths, hotel a la carte table service, and all the knick-knacks of civilization. We are not going to run our camp on that style. The only things we plan to provide are good, easy beds with comfortable mattresses, but for the rest, the guests will have to take the regular western ranch style of living with plain food, served in ranch style.

—Calgary Herald.

#### TO STOCKMEN IN MANGE AREA

"The time for compulsory dipping is fast approaching," says Mr. Hargrave, chief inspector for mange in Alberta, "and it behooves every stockowner to be in readiness by the date arranged, June 24, 1920, when simultaneous dipping of all cattle will be commenced."

The quarantine will be removed from the whole mange area after the proper treatment of all cattle, but it is imperative that everyone understands the dipping must be thorough. All cattle whether range, purebred, dairy or farmers' cattle or calves, are to be dipped. There will be no distinction between the owner with one cow and calf and the owner with several thousand head; there are no exceptions.

It is of personal interest therefore for each to see that all cattle are brought in without exception. Committee men would do well to enlighten all stockowners of their district on this point. There will be a heavy penalty for evasion even in the case of a single animal.

The time chosen for dipping is in accordance with the wish of representative stockmen. By the end of June there will be practically no cows in calf. At that time the winter coat is shed, the hair short and oily, which in itself tends to resist the spread of mange on the body. The animal has the least amount of infection and least cover for the parasites, so that the solution more readily soaks the skin and comes in direct contact with the mange mites. With the summer coat cattle suffer less discomfort as evaporation is not unduly prolonged.

Vat owners should take immediate steps to secure their supply of sulper and have arrangements made to get lime a short time before dipping. There is danger of the lime deteriorating if not properly stored and so lessening its value in preparing a satisfactory solution for the vat.

As above mentioned the first dipping commences June 24, and the same cattle must be brought to the vat for the second dipping in not less than ten nor more than fifteen days later.

Owners of stock should be advised to make arrangements with the vat management as to which days to bring their cattle to be dipped. This will avoid confusion where there are more cattle than can be dipped in one day.

#### As It Is Spoken

In a British railway carriage of the type known as "American" because, unlike the majority, it has an aisle running the length of the car, two U. S. soldiers in khaki were standing in the aisle. Nearby were seated a prim and elderly English lady and her daughter, who were gathering their belongings, preparing to alight at the next station.

Suddenly the elder lady nudged her daughter and whispered: "Mary, mind what I say! When we get off just do as I do, and back down the aisle. I can't tell you why now." Daughter obeyed and both ladies left the train as if departing from the scene of royalty. Safely arrived on the platform, the daughter naturally asked why. "Mary," said her mother, "you saw those two American soldiers—they call them doughboys. I believe. Well, when we started to get out I overheard one of them say to the other: 'When those two dames get off we'll pinch their seats.'—Ex.

### THE REASON BACK OF IT

Was the real reason back of the Carranza overthrow and his assassination one touching upon purely Mexican problems, or did it have something to do with the profits of the large foreign, American and British, oil interests below the Rio Grande?

Or was it that 54 cents-a-ton-export-tax-on-oil?

The Wall Street Journal says: "The increase in export taxes from 30 cents to 54 cents a ton, proposed by Carranza, apparently as the last historical act of his regime, has been set aside by the new powers. The new government has affirmed the old taxes on oil."

In a nutshell it was this: Oil interests were reaping unheard-of profits by draining Mexico of oil. Carranza sought to annex some of these abnormal profits by increasing the export duty on oil. The proposed increase was to have gone into effect May 25.

After Carranza's increase proposal was made, the weakling revolution became a thing of night. It spread rapidly. It was well financed. Carranza's government fell. And Carranza fell. So did his proposal to increase export taxes.

The revolutionists, now the administration, appear to have paid their debt to the oil interests by thus wiping out the suggestion to give the people of Mexico a larger share in the profits made out of the oil drained out of their soil.—Calgary Albertan.

### TWO GOOD REASONS

Two good economical reasons why you should eat more fish:

It is cheap and nutritious, and provides a thrifty meal.

One of Canada's greatest sources of wealth is her fisheries, and you help develop the industry by eating fish, and also help to put Canada in a better financial position.

Probably you are not aware how little fish Canadian people use.

Great Britain is one of the greatest fish consuming countries in the world. During 1918 she had a per capita consumption of 58 pounds, and in 1919, it is believed, this was increased to 60 pounds. This means that each individual consumed at the rate of more than one pound per week.

In the United States last year it is estimated by officials at Washington the per capita consumption was 19 pounds. Although little reliance can be placed in this estimate there is no doubt but that the local consumption in the United States has increased greatly in recent years.

A few years ago the per capita consumption in Canada per annum was a matter of ounces. Through the combined efforts of the Canada Food Board and the Fisheries Branch it is estimated that the local consumption at one time reached a point equal to 45 pounds per capita. During 1919 it is estimated the per capita consumption was somewhere between 23 and 25 pounds per annum.

Canada is one of the greatest, if not the greatest, fish producing countries of the world. Why have our people so little fish?

### DAIRY OUTPUT IN 1919 VALUED AT \$250,662,352

Canada during 1919 produced dairy products to the value of over a quarter of a billion dollars, according to a statement given by J. A. Ruddick, dairy and cold-storage commissioner in the last issue of the Agricultural Gazette. Particulars of the output are as follows:

Cheese	.....	\$47,250,000
Creamery butter	.....	53,500,000
Dairy butter	.....	56,250,000
Condensed milk	.....	20,000,000
Milk powder	.....	1,662,352
Milk, cream, ice-cream	.....	72,000,000

### EXPECT HEAVY FLOODS

A warning is being sent out from the reclamation service of the department of the interior at Calgary to persons who are operating on or have property along the large rivers in Alberta. Investigations show that there is more snow in the mountains this year than under ordinary conditions, and this fact, combined with the very late spring, creates a condition favorable for very high water or floods. This is not a prediction that there will surely be a flood, but rather an early warning that there may be one. Persons carrying on any construction work, operating ferries, driving logs, etc., will be well advised to make every provision against the eventuality of a flood.

Every inhabitant of the city of Lethbridge, of 21 years or over, who has resided in the city for two months or over and has not been assessed on the assessment roll of the city, has to pay a poll tax of \$10.

### WANT SQUARE DEAL

At a special general meeting of the Canadian Daily Newspapers' Association, held in Ottawa recently, to consider the precarious position of many Canadian newspapers with regard to the newsprint supply, it was decided to appeal to the federal government for legislation, requiring each newsprint manufacturer unwilling to do so to supply his proportion of the domestic requirements of newsprint at prices not higher than the current contract prices for export to foreign countries.

### HIS WORK GOES ON

John A. Vincent, the man who started the famous Chautauqua assembly, is dead. Back in 1870, Bishop Vincent realized that there was a great need amongst the Sunday school teachers of his church—the Methodist—for increased knowledge and culture in order to secure the best results in Sunday school work, and with this object in view he established a two weeks' summer course held in the open.

### BE A PRODUCER

Cut out the monkey business. Get busy, and keep busy—in your gardens, people. A Montreal commission man predicts that potatoes will be 20 cents per pound this time next year. We are chumps if we have to buy any. All kinds of foodstuffs will be dear and scarce. The family that owns a good garden and uses it will be rich. Plant and grow everything. Work while the sun shines. There's money in it—and a full belly.

### PENSIONS TO OFFICERS

A return tabled in the house of commons by the minister of militia shows that 109 officers of the permanent military forces in Canada have retired since the armistice on pensions ranging from \$416 to \$5,300. One over \$5,000, one over \$4,000, three over \$3,000, 14 over \$2,000 and 90 under \$1,900 comprise the list of officers receiving permanent annual pensions.

### RAISING SUNKEN SHIPS

The business of raising sunken ships promises to be so lucrative that a number of companies have been formed for that purpose alone. Great Britain has recovered more than five hundred of the six thousand ships that it lost during the war, and the salvage companies of the United States plan to raise all American craft that they can find, unless the difficulties are insurmountable.

### ALMOST A CRIME

Charles A. Morre, governor of Boston Federal Reserve Bank, in Tribune dispatch, says talk of panic is not only unnecessary but almost a crime, and that with reserve system panic is almost impossible. Reports from governors disclose banks are giving preference to financing of crops. Car shortage and backward crops cause cutting of prices.

The Methodist Church of Canada proposes a minimum salary for its convened at Banff yesterday, June 9.

## VULCAN NEWS ITEMS

The pictures at the Community Theatre were of the usual high order last week and were well liked.

Work on the erection of the stand for the Vulcan band is now under way and will be ready for use in the course of a few days. The work is being done by Messrs. Reid and Lindley.

Choir practice for the adult choir of the Vulcan church will be held on Friday evening next at 8:30. A good attendance is requested.

Mrs. G. C. Valens, of Edmonton is visiting her brother Rev. A. E. Hayes, for a few days.

Services will be held on Sunday next by the Rev. A. E. Hayes, at Alton.

Don't forget Gillespie's clearance sale of Gent's Furnishings.

Mr. L. McEwan of Claresholm was a business visitor on Thursday last.

Mr. J. S. Sonson of Nanton was a business visitor in Vulcan last week.

Mr. and Mrs. W. A. Torgerson and family left by car on Saturday last for Howley, Minnesota where they will spend a few weeks.

Mr. and Mrs. C. R. Berry, of Westlock, Alberta, spent several days in Vulcan last week.

Mrs. J. Oliver, of Calgary arrived in Vulcan on Saturday last to visit with her parents Mr. and Mrs. J. A. Lindsay.

Mr. R. Todd, who has been in this district for some time returned to his home at Cochrane last week.

See Gillespie's lines of Underwear, you can't beat them for price or quality.

Mr. and Mrs. R. Elvas, Miss Malloy, Miss Hodge, Mr. Geddes and Mr. Shields motored to Cayley on Sunday last.

A celebration is to be held by the village of Vulcan on Thursday, July 1, (Dominion Day) which will include all kinds of sports, namely: horse racing, foot racing, baseball, etc., and a public holiday will therefore be declared for that day. Watch for particulars in a later issue.

Mr. D. McIntyre's sailing boat, "Rumely 1st" is now on Lake MacGregor undergoing her trial and is proving a very fast boat. We have heard (although the rumor is not confirmed) that Mr. McIntyre intends to challenge the winner of the American Cup, the race to be run on Lake MacGregor. Good luck to you, Mac.

The regular meeting of the Boy Scouts was held on Friday evening last. The scouts formed up on the parade ground and from there marched to the fair grounds where they were put through some drills and patrol work, after which they had a little recreation in the form of baseball.

Mr. Jas. M. Ryan, employed by the government as range rider, suffered a very painful accident last Friday afternoon by having his leg broken at and above the ankle. He was riding around the country making arrangements for the dipping of cattle in this district when his horse fell with him causing the injuries. The unfortunate man was removed to the High River General Hospital, and received medical attention and is now coming along fine.

## COURT NEWS

H. Parker of Brant appeared before J. A. Lindsay, J.P., at the local police court on Monday, charged with common assault on the person of Steve Sallanbach, also of Brant. It appears that Mr. Parker was hauling grain and was using the trail running by Sallanbach's farm, near which is a bad piece of road. In order to avoid this bad spot he thought he would try to avoid it by cutting through Mr. Sallanbach's farm, and meeting him on the trail, he informed him of his intention. Mr. Sallanbach informed him that he would not allow him to do so and followed him in his buggy to stop him if he tried to do so. Mr. Parker insisted on going through the gate which brought on an altercation between the parties mentioned, during which Parker is alleged to have assaulted Steve Sallanbach. The evidence went to show that Parker took the law into his own hands in that he endeavored to trespass on complainant's farm and was found guilty and a nominal fine was inflicted.

William Lancaster, inspector of mines for the Kootenay district, was killed instantly on Saturday afternoon when his automobile plunged over a small bridge near Fernie.

## REID HILL SCHOOL REPORT

Results of examinations for the Reid Hill school for the month ending May 31:

Grade VII—Louise Melton 78, Boyd McKay 75.

Grade V—Howard McKay 64, Francis Warden 60.

Grade II—William Wickstrom 80, Gordon Gardner 75, Adolph Wickstrom 70.

Grade I—Verna Warden 100, Ruth McKay 100.

Not ranked: Kenneth Gardner, Norma Gardner, Genevieve Preffer. Teacher, Miss Paul.

## Big Sale at Spooner's

Mr. R. B. Stewart, sales manager of the Canadian Selling Service Co., arrived in Vulcan last Monday to conduct A. G. Spooner's Big Clean-Up Sale, which commences Saturday first June the 12th.

In conversation with Mr. Stewart, he was quite enthusiastic about the quality of goods that Mr. Spooner carries, "Society Brand" clothes, Hart's Shoes, Stanfield's and Cee-tee Underwear, grades of Merchandise that needs no boasting. He seems to be quite optimistic of a very successful Sale. The big cut in prices that A. G. Spooner is making on everything in the store he says will simply make Men buy clothing and furnishings. Mr. Stewart makes the assertion, that Men's Clothing and furnishings at the Sale will be lower than Makers prices to-day, if that be so and we have no reason to doubt it, Saturday next should see big crowds of Men and Women too at Art. Spooners Store.

Mr. Stewart has just finished a most successful sale at High River, for Lablows Ltd.

## COMMUNITY CLUB NEWS

The efforts of the Vulcan Community Club for the benefit of town and district are certainly having good results. Some time ago negotiations were started in several directions with a view to having a telephone installed in the depot and after consid-

erable correspondence about this matter, finally succeeded in their object and the much-needed convenience was installed by the telephone department. Then again the subscribers of a new rural line running south-west of Vulcan, wished to be connected with Vulcan instead of Champion as was intended and asked the club to take the matter up for them. This was done, resulting in the subscribers getting their wish granted. The following correspondence on the subject, however, speaks for itself and we take great pleasure in re-producing it for the benefit of our readers:

May 12, 1920.  
Mr. W. B. Ferguson,  
Commercial Engineer,  
Alberta Govt. Telephones.

Dear Sir:

Re new rural line south-west of Vulcan, Townships 15-16, Ranges 25-26.

Subscribers of the above-mentioned rural line who will be affected by its operation have asked the Vulcan Community Club to take up with you the question as to whether they shall be connected with the Vulcan or Champion exchange. They understand that it is the intention of the department to connect their phones with the Champion exchange, and as they do their business, such as banking, purchasing of supplies, obtaining freight, etc., at Vulcan, it is their wish to be connected with the Vulcan exchange. This, we believe, means quite a lot to them in several ways, and they have asked us to see if something could not be done so that they would have connection through the Vulcan central instead of Champion. If this is at all practicable, and will not mean too much extra expense and labor for your department we would ask you to kindly use your influence in granting their request.

Your very truly,  
The Vulcan Community Club

C. E. Colwell, Esq.,

Secretary-Treasurer  
Vulcan Community Club, Vulcan.

Dear Sir:

Re new rural line south-west of Vulcan, Townships 15-16, Ranges 25-26.

We beg to acknowledge receipt of your communication dated May 12. We have made a development study of the district west of Champion and a number of the parties who were approached by our inspector intimated that they preferred service with Vulcan. We have not any lines in township 16, range 25, running south to the applicants and the result is this, that if they desire service this year we will require to connect them with Champion and later on, possibly next year, when we are making a development study of township 16-25, we will build up to all applicants and then re-arrange the exchange area, as far as possible meeting the wishes of the applicants.

I would mention, Mr. Colwell, that it is utterly impossible for the department to construct all of the lines which are required in the Vulcan area this year. We are carrying out a very extensive program of construction throughout the province, and Vulcan is being given a very fair share of the work inasmuch as we will have in the neighborhood of 100 additional applications who will be given Vulcan service. We would very much like to undertake the construction and satisfy the applicants at once, but as mentioned, it is utterly impossible. I feel, then, that it is better for us to give them service into Champion and then later on we might re-arrange the area to agree with their desires.

I would ask you to communicate with the interested parties and advise them accordingly.

Your very truly,  
W. B. FERGUSON,  
Commercial Engineer.

Edmonton, May 29, 1920

C. E. Colwell, Esq.,  
Secretary-Treasurer Vulcan  
Community Club, Vulcan, Alta.

Dear Sir:

Re new rural line south-west of Vulcan, Townships 15-16, Ranges 25-26.

Further to our communication of May 17, we beg to advise you that it may be possible for us to give the majority of the parties Vulcan service during this season.

We are communicating direct with the applicants and I hope to see the estimate prepared in the very near future.

Your very truly,  
Alberta Govt. Telephones,  
W. B. Ferguson,  
Commercial Engineer.

Following is correspondence in regard to a government grant to the proposed library to be established in Vulcan in the near future.

Edmonton, May 21, 1920

C. E. Colwell, Esq.,  
Secretary-Treasurer,  
Vulcan Community Club.

Dear Sir:

Yours of May 20 has been received.

## ESTRAY

## FOR SALE

WORK HORSES—Good work horses for sale, broken or unbroken, or will trade for cattle. Apply Isaac Jacobson, P. O. Box 336, Vulcan, or phone R507.

## FOUND

FOUND—Black Mare, 5 or 6 years old, white stripe on face, mark on right rib. Owner apply Advocate Office.

d. I will look into the question as to whether or not our act permits us to make library grants to other than municipal libraries and you will be advised in due course. In the meantime, permit me to say that this is the first communication of the kind which I have received from you and if a letter has been written previously it apparently did not reach its destination, as I always make a point of at least promptly acknowledging communications even when at times action cannot always be taken.

Your very truly,  
C. R. MITCHELL,

Edmonton, May 27, 1920

C. E. Colwell, Esq.,  
Secretary-Treasurer,  
Vulcan Community Club.

Dear Sir:

Your letter of May 20 with respect to your endeavor to establish a public library in connection with the Vulcan Community Club, has been handed to me by the Hon. C. R. Mitchell for attention.

I enclose a letter from the deputy-attorney-general advising that under the conditions the grant is not warranted.

Yours truly,  
W. F. BISHOP,  
Acting Deputy Provincial  
Treasurer.

Dept. of Attorney-General,  
Alberta,  
Edmonton, May 25, 1920.

Memo for the Acting Deputy

Provisional Treasurer.

Re Public Libraries Act and Vulcan Community Club.

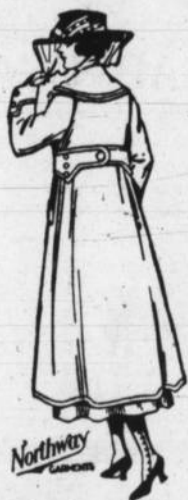

Under the Public Libraries Act, being Chapter 17 of 1907, public libraries may be established in any town or city, and a grant given by the lieutenant-governor to such public library of dollar for dollar.

The municipality of Vulcan does not appear to be either a town or a city, consequently grant is not warranted.

A. G. BROWNING,  
D. A. G.
